Row No.	Description	Hong Kong basis HK\$'000	Basel III basis HK\$'000			
9	Other intangible assets (net of associated deferred tax liability)		-			
	Explanation As set out in paragraph 87 of the Basel III text issued by the Basel Committee (December 2010), mortgage servicing rights (MSRs) may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to follow the accounting treatment of including MSRs as part of intangible assets reported in the AI's financial statements and to deduct MSRs in full from CET1 capital. Therefore, the amount to be deducted as reported in row 9 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 9 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of MSRs to be deducted to the extent not in excess of the 10% threshold set for MSRs and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.					
10	Deferred tax assets (net of associated deferred tax liabilities)	209,900	-			
	Explanation As set out in paragraphs 69 and 87 of the Basel III text issued by the Basel Committee (Decer to be realised are to be deducted, whereas DTAs which relate to temporary differences may CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified th is required to deduct all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, reported in row 10 may be greater than that required under Basel III. The amount reported basis" in this box represents the amount reported in row 10 (i.e. the amount reported under the by reducing the amount of DTAs to be deducted which relate to temporary differences to the e threshold set for DTAs arising from temporary differences and the aggregate 15% threshold from temporary differences and significant investments in CET1 capital instruments issue (excluding those that are loans, facilities or other credit exposures to connected companies) ur	be given limited represented in the amount to be dunder the colune "Hong Kong bas extent not in excessed set for MSRs, End by financial set	ecognition in Kong, an Al deducted as nn "Basel III is") adjusted s of the 10% DTAs arising			

Evnlanation

10% threshold)

For the purpose of determining the total amount of insignificant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 18 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 18 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.

Insignificant capital investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above

Row No.	Description	Hong Kong basis HK\$'000	Basel III basis HK\$'000
19	Significant capital investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	,	- Into 000
	Explanation		

For the purpose of determining the total amount of significant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 19 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 19 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.

Insignificant capital investments in AT1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)

Explanation

The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see note re row 18 to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant capital investments in AT1 capital instruments may be smaller. Therefore, the amount to be deducted as reported in row 39 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 39 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the Al's connected companies which were subject to deduction under the Hong Kong approach.

Insignificant capital investments in Tier 2 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)

Explanation

The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see note re row 18 to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant capital investments in Tier 2 capital instruments may be smaller. Therefore, the amount to be deducted as reported in row 54 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 54 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the Al's connected companies which were subject to deduction under the Hong Kong approach.

Remarks:

The amount of the 10% threshold mentioned above is calculated based on the amount of CET1 capital determined in accordance with the deduction methods set out in BCR Schedule 4F. The 15% threshold is referring to paragraph 88 of the Basel III text issued by the Basel Committee (December 2010) and has no effect to the Hong Kong regime.

LIQ1: Liquidity Coverage Ratio – for category 1 institution (continued)

Notes:

The weighted amount of HQLA is to be calculated as the amount after applying the haircuts as required under the Banking (Liquidity) Rules.

The unweighted amounts of cash inflows and cash outflows are to be calculated as the principal amounts in the calculation of the LCR as required under the Banking (Liquidity) Rules.

The weighted amounts of cash inflows and cash outflows are to be calculated as the amounts after applying the inflow and outflow rates as required under the Banking (Liquidity) Rules.

The adjusted value of total HQLA and the total net cash outflows have taken into account any applicable ceiling as required under the Banking (Liquidity) Rules.

In the first half of 2018, the Group has maintained a healthy liquidity position. The LCR remained stable and there was no material change throughout the first half of 2018. The average LCR of the first and the second quarter were 142.76% and 136.13% respectively. The average HKD level 1 HQLA to HKD net cash outflow ratio in the first half of 2018 was 230.02%, well above the regulatory requirement of 20%. The ratios have maintained at stable and healthy levels.

The HQLA consists of cash, balances at central banks and high quality marketable securities issued or guaranteed by sovereigns, central banks, public sector entities or multilateral development banks and non-financial corporate debt securities. In the first half of 2018, the majority of the HQLA was composed of Level 1 HQLA.

The net cash outflow was mainly from retail and corporate customer deposit which are the Group's primary source of funds, together with deposit and balance from bank and other financial institution.

To ensure stable, sufficient and diversified source of funds, the Group actively attracts new deposits, keeps the core deposit and obtains supplementary funding from the interbank market. Other cash outflow, such as commitment, cash outflow under derivative contract and potential collateral requirement, were minimal to the LCR.

Majority of the Group's customer deposits are denominated in HKD, USD and RMB. As the supply of HKD denominated HQLA in the market is relatively limited, the Group swaps surplus HKD funding into USD and other foreign currencies, part of funding are deployed to investment in HQLA.

LIQ2: Net Stable Funding Ratio – for category 1 institution (continued)

Notes:

The above disclosures are made pursuant to the section 16FL and 103AB of Banking (Disclosure) Rules. The items disclosed are measured according to the methodology and instructions set out in the Stable Funding Position Return (MA(BS)26) and the requirements set out in Banking (Liquidity) Rules.

Net Stable Funding Ratio ("NSFR") is defined as the amount of available stable funding ("ASF") relative to the amount of required stable funding ("RSF"). The ratio is calculated after applying the respective ASF or RSF factors required under the Stable Funding Position Return (MA(BS)26). It requires banks to maintain a stable funding profile in relation to the composition of banks' assets and off-balance sheet activities.

The Group has maintained a healthy liquidity position. The NSFR of the first quarter and the second quarter of 2018 were 114.10% and 112.99% respectively. The ratio remained stable and well above the regulatory requirement of 100% throughout the first half of 2018. The weighted amount of ASF items mainly consists of retail and corporate deposits which are the Group's primary source of funds, together with regulatory capital. The weighted amount of RSF items mainly consists of loans to customers and investments in debt securities.

CR1: Credit quality of exposures

For exposures subject to the STC approach, defaulted exposures are exposures which are overdue for more than 90 days or have been rescheduled. For exposures subject to the IRB approach, defaulted exposures are exposures which fall within section 149 of the Banking (Capital) Rules.

CR7: Effects on RWA of recognised credit derivative contracts used as recognised credit risk mitigation – for IRB approach

Up to the date of report, the Group has not used any recognised credit derivative contracts for credit risk mitigation. Therefore, pre-credit derivatives RWA was equal to actual RWA.

		At 30 June	e 2018

MR3: IMM approach values for market risk exposures

The maximum, minimum, average and period-end values were calculated for the reporting period from Jan 2018 to Jun 2018. Movement of Stressed VaR was driven by changes in exposure and risk level during the reporting period.

		At 30 June 2018
		нк\$'000
VaR ((10 days – one-tailed 99% confidence interval)	
1	Maximum Value	9,915
2	Average Value	5,489
3	Minimum Value	3,411
4	Period End	7,308
Stres	ssed VaR (10 days – one-tailed 99% confidence interval)	
5	Maximum Value	23,783
6	Average Value	15,932
7	Minimum Value	7,186
8	Period End	21,521
Incre	emental risk charge (IRC) (99.9% confidence interval)	
9	Maximum Value	-
10	Average Value	-
11	Minimum Value	-
12	Period End	-
Com	prehensive risk charge (CRC) (99.9% confidence interval)	
13	Maximum Value	-
14	Average Value	-
15	Minimum Value	-
16	Period End	-
17	Floor	-

MR4: Comparison of VaR estimates with gains or losses

Below is the 250-day history for back-testing results of the Group's market risk under IMM approach. The Group adopts a uniformed VAR calculation model, and daily VaR is calculated at a 99% confidence level using two years of historical market data. During the period, there were 2 hypothetical losses exceeding the VaR for the Group as shown in the back-testing results (No exception was found for actual P&L). The exceptions were driven by unexpected market movement in foreign exchange and interest rates.

Actual P&L in back-testing does not include reserves, commissions and fees.
